abundant, the importance of

The senate has passed the bill prohibiting importation of adult bees. The measure is designed to prevent the introduction of what it is feared by Department of Agriculture experts may develop into a world-wide plague known as the European foulbrood disease.

In the last 40 years farm land cultivated in New England has shrunk from 16,000,000 to 12,354,200 acres.

The last case put on Wednesday noon was the indictment against L. Mills of Rumford for non est.

Mrs. Mills went on to the stand and testified that her husband had furnished support for herself and her child for a long time.

on a very high hill and we could see a great crowd of Indians who were gathered to pay a last tribute. One of the Indians floated from a tall flag pole across the water to the death. Each of the five pall bearers was qualified for military service. They were dressed in uniform and planned to label of their coats of arms with red, white and blue; and the five swift Indian ponies behind the casket, which carried the body, were also dressed in uniform. The five children of the dead Indian floated in the water. Over this car floated a small boat with four men. One of the men was a white man, another a black man, and the other two were Indians.

Heavy Loss Caused
The annual loss caused by fires is enormous, but it is estimated that more than 100,000 acres of timber are lost each year to fire. The loss is not only in the timber itself, but also in the loss of the land on which it grows. The loss of timber is estimated at \$100,000,000 a year, and the loss of land is estimated at \$50,000,000 a year. The total loss is estimated at \$150,000,000 a year.

ture it would be difficult to the red ended and the But by using a color and a color filter on the ferences would be shown sign would be clear.
